Implementation Guidelines for the Five-Year Integrated Bachelor's and Master's Degree Program in the Department of Nutrition at Chung Shan Medical University

- Article 1** To encourage outstanding undergraduate students in the Department of Nutrition (from now on referred to as the "Department") to continue their studies in the Master's program within the Department, to achieve continuous learning and shorten the duration of their studies, these implementation guidelines (from now on referred to as the "Guidelines") are established by the provisions of Article 2 of the "Chung Shan Medical University Five-Year Integrated Bachelor's and Master's Degree Program Regulations."
- Article 2** Undergraduate students in the Department who have completed five academic semesters and achieved a ranking within the top 50% of their class, with passing grades in all required courses, may apply to the Department by the end of March of the third year, second semester (application form provided below).
- Article 3** Applicants must submit the following documents:
- (1) Application form for the program.
 - (2) Official academic transcript (including class ranking).
 - (3) Two letters of recommendation (at least one from a faculty member within the Department).
 - (4) Study plan, including research interests and goals.
 - (5) Any academic publications (theses, research reports) should be submitted if available.
- Article 4** Students who pass the review by the Department Council will be granted the status of a Master's program preparatory graduate student (from now on referred to as "preparatory graduate student"), with the number of admissions limited to a maximum of three-fifths of the quota for admitted students in the Department's Master's program entrance examination.
- Article 5** To obtain the status of a preparatory graduate student, students must get a Bachelor's degree within four years and participate in the university's Master's program entrance examination or general student admission examination in the year of graduation. Only after successful admission can they officially obtain the status of a Master's program graduate student. Preparatory graduate students who receive a Bachelor's degree as scheduled will retain their prior graduate student status.
- Article 6** Courses taken during the undergraduate program may be credited for up to three-fourths of the required credits for the Master's program (excluding thesis credits). However, if the courses have already been counted towards the credits needed for the undergraduate degree, they cannot be applied for credit exemption in the Master's program. Preparatory graduate students must submit an "Application for Credit Exemption for Graduate Students" before the official start of the semester they enroll in. Only on-time applications will be accepted.

Article 7 Any matters not covered in these guidelines shall be handled by the university's regulations and relevant laws.

Article 8 These guidelines shall be announced and implemented after approval by the Department Council and College Council and subsequently approved by the Academic Affairs Council. Any amendments shall follow the same process.
