Regulations for Direct Admission to the Doctoral Program for Students of the Department of Public Health at Chung Shan Medical University

- Article 1 These operational regulations are established in accordance with the “Chung Shan Medical University Guidelines for Students’ Direct Admission to Doctoral Programs.”
- Article 2 Master's students who have completed at least one year of study (excluding those enrolled in prerequisite courses for the master’s program), who demonstrate outstanding academic performance and research potential, and who are recommended by two full-time faculty members at the rank of associate professor or above (one of whom must be the student’s thesis advisor), may apply for direct admission to the doctoral program. The criteria for “outstanding academic performance and research potential” are as follows:
1. Submission of a research proposal, representative academic report, or scholarly publication that, upon review, is deemed to demonstrate research potential.
 2. A first-semester average grade of 85 or above in required courses, or ranking within the top one-third of the class, or other exceptional circumstances as determined by the department to reflect outstanding academic performance.
- Article 3 The number of master's students from this department eligible for direct admission to the doctoral program shall be limited to 40% of the doctoral program enrollment quota approved by the Ministry of Education for the current academic year. However, if the approved quota is fewer than five students, no more than two students may be admitted through direct admission. The aforementioned quota must be included within the total enrollment capacity approved by the Ministry of Education for the university in that academic year.
- Article 4 Students applying for direct admission to the doctoral program must submit the following documents:
1. One copy of the application form for direct admission to the doctoral program.
 2. Two letters of recommendation—one from a full-time faculty member at the rank of associate professor or above in the department, and one from the student’s master’s thesis advisor.

3. One copy of a research proposal (or a representative academic report or scholarly publication).

4. One copy of the complete academic transcript.

Master's students in this department who wish to apply for direct admission to the doctoral program must submit the application form to the department office during the second semester. The exact submission deadline will be announced separately by the department office.

Article 5 Evaluation Criteria: Academic transcripts from previous years: 30%; Doctoral research proposal: 40%; Research potential: 30%

Article 6 Upon receiving applications, the department shall convene a departmental meeting to review and approve the candidates. The list of approved students will then be submitted to the university president for final approval and forwarded to the Office of Academic Affairs for record-keeping. Only after these steps may the student proceed with direct admission to the doctoral program.

Article 7 Graduate students approved for direct admission to the doctoral program shall, starting from the academic year of approval, follow the same regulations as newly admitted doctoral students regarding course enrollment, academic evaluation, and duration of study.

Article 8 Students admitted to the doctoral program through direct admission may apply to return to their original department to continue pursuing a master's degree under any of the following circumstances, subject to approval by the departmental meeting and final authorization by the university president:

1. Discontinuation of doctoral studies due to personal reasons.
2. Failure to pass the doctoral candidacy qualification examination.
3. Failure to pass the doctoral degree examination and not meeting the conditions specified in Article 9.

The period spent in the doctoral program under the above circumstances shall not be counted toward the maximum time limit for completing the master's degree.

Article 9 Graduate students admitted through direct admission to the doctoral program who have completed the required period of study and passed the doctoral candidacy qualification examination but fail to pass the doctoral degree examination may be awarded a master's degree if their doctoral dissertation is deemed by the doctoral examination committee to meet the standards of a master's thesis.
